Household Income Measure on Baseline Sweep

In 1987 the fixed choice categories for household income were changed after the schedules had been printed. Unfortunately when the value labels for monthly income were typed in for the 15s they were copied from the schedule and are therefore incorrect. I do not think there are value labels for the 35s but if anyone looks at the schedule to obtain these they will similarly be wrong. This may recently have affected work being done/reported by Annie, Anne and Russell. As I understand it the categories as presented to respondents in 1987/8 are as attached. A-K directly convert to 1-11 as punched up. Value labels for 15s should thus be changed accordingly, and these values should be entered into the documentation Barbara is currently producing.
