CURRENT HEALTH

I am going to give you a copy of a measure which we call the 'faces scale' (Card 1), you may remember it from last time. I would like you to keep it beside you as we will use it a number of times.

As you can see there are seven different faces. They go from face A which is a face showing someone who is very happy and has no stress or worries to face G which shows someone who is very unhappy or has a lot of stress or worries.

FHLTH.C

Q1 I would like you to think overall about your health now. Which face shows best how you feel about your health now?
code A=1 B=2 C=3 D=4 E=5 F=6 G=7

LONG-STANDING / CHRONIC ILLNESS

I'd like to ask now about all the particular conditions which might affect your health.

Interviewers:

First read out prompt a). For each condition mentioned fill in the name or details of the condition in the box on the first blank condition sheet and ring the appropriate 'prompt' code at question b). In this case **ring code 1. (Don't forget to do this).**

Then ask: '**Does ...(condition)... normally limit your activities in any way?**' if yes '**is that...**' and read out the prompts at question c)

Leave parts d to l for now and ask '**Is there anything else?**' and fill in the next sheet if another condition is mentioned.

(Start at sheet 1 and always fill in the next blank sheet. **Do not skip sheets).**

Carry on until they stop telling you about new conditions.

Then read out prompt b) and follow the same procedure. Remember to **ring code 2 for prompt code.**

Then read out prompt c) and follow the same procedure. Remember to **ring code 3 for prompt code.**

Finally, read out prompt d) and show the respondents cards 2 and 3. Remember to **ring code 4 for prompt code.**

When you have asked all the prompts go back and, starting at sheet 1, ask the detailed questions about each condition they mentioned, i.e. questions d) to l).

Q19 a) Do you have any **LONG-STANDING** illness, disability or infirmity? By **LONG-STANDING** I mean anything that has troubled you over a period of time or that is likely to affect you over a period of time? (Probe: "Is there anything else?").

b) Do you have any other health problems or conditions which seriously affect your health now or which you think will seriously affect your health in the future and which you haven't already told me about?

c) Do you suffer from anxiety or depression, or do you have any mental problems, phobias, panics or nervous disorders which you haven't already told me about?

d) I'm going to show you two cards containing lists of common conditions people suffer from. Could you tell me if there are any of these conditions which you suffer from now and which you haven't already told me about?

For each condition mentioned try to get a reasonably clear description of the health problem. If they say 'cancer' for example, ask for type or site. If they say 'heart trouble' ask "**Did a doctor ever tell you what the condition was called?**" and so on.

Saliva, Blood pressure, P.A.S.A.T. and reactivity**You are now going to**

- test the respondent's BP using a **Hawksley** random zero sphyg and an automated **OMRON** sphyg.
- test their change in blood pressure (reactivity) when asked to do a difficult mental arithmetic task (the P.A.S.A.T.)
- collect a sample of Saliva using a salivette (cotton wool swab) at the same time.

There are detailed separate instructions in the interviewer manual for taking, marking and storing the sample of saliva, and for taking the BP measurements before and during the stress (P.A.S.A.T.) test.

Begin by reminding the respondents that we are doing some new physical measures this time. Say:

- **You will remember when I asked you to sign the form at the beginning of the interview that we are including a couple of new tests of your health this time - a blood pressure measurement whilst you are doing a mental arithmetic test and a sample of saliva to compare the general state of the body's immune system (the body's first defence against infection).**
- **It takes a little while to set up the blood pressure machines. Please can you put this cotton wool roll under your tongue for a moment whilst I put the blood pressure cuff on. It is very important that you don't chew on the roll but just keep it under your tongue.**

SIGA SAMPLE

Follow the detailed instructions in the interviewer manual on taking the saliva sample. Ask the respondent to swallow hard to clear the saliva from his/her mouth. Start the 2 minute timer as the respondent places the swab in his/her mouth. The cotton wool must be removed after exactly two minutes. Mark and store the sample following the detailed instructions given.

While they have the cotton wool roll in their mouth,

- set up the tape recorder,
- set up the **Hawksley** and **OMRON** sphygs
- place the cuff for the **Hawksley** sphyg on their arm.

- Begin the P.A.S.A.T. and measure BP twice during the P.A.S.A.T. test as described in the detailed instructions Using the **OMRON** sphyg. Record the results below. Return the printout from The OMRON with the schedule.
